Teresa Romão

No	Problem	Heuristic	Description	Severity	Solution
1	Table numbers should be presented in a dropdown list	Error Prevention; User Control and Freedom	The user is obligated to write manually the table he wants	3	Dropdown table with available tables
2	Can't see our bookings	Visibility of System Status	The user is not able to see the booking it just made, just a confirmation message	4	Add a see bookings functionality
3	Ratings are too small	Aesthetic and Minimalist Design	It's hard to see the actual ratings for the restaurant - we recommend maybe a star rating system	1	Use a star rating system
4	H3 logo in other restaurant pages	Aesthetic and Minimalist Design	The logo from another restaurant appears in restaurants from other pages (aka visual bug)	1	Remove logos from other restaurant pages
5	Price and number of items orders too small	Aesthetic and Minimalist Design; Error Prevention	In the restaurant page it's hard to follow the price and the number of items i've added to the cart	2,(3)	Change price place or size, more user friendly way to show the number of items in cart
6	No button to go back	User Control and Freedom	It's not possible to go back in the app - ex: going back from the restaurant to the homepage (except if you click the default Android button)	2	Add a go back button
7	Button to remove item from order doesn't have a label	Error Prevention	In the takeaway order menu, the "minus" button doesn't have any type of label	3,(4)	Add a label
8	No cancel button in the checkout menu	Error Prevention; User Control and Freedom	In the checkout menu, there is no way to cancel the order you made, only to leave it idle	3	Add a cancel button
